## PROFESSIONAL SUMMARY

Senior .NET Full Stack Developer with 13+ years of experience designing and developing scalable, high-performance enterprise applications. Expert in .NET Core, C#, Angular, and Microsoft Azure with proven success in microservices architecture, event-driven systems (Kafka/RabbitMQ), and cloud-native deployments using Azure Kubernetes Service (AKS). Currently employed at Bosch Global Software Technologies, a subsidiary of the German Bosch Group. Eligible for EU Blue Card and open to immediate relocation to Germany.

## WORK EXPERIENCE

### Lead Engineer – Full Stack Developer

**Bosch Global Software Technologies, India** | May 2021 – Present

- Designed and owned end-to-end system architecture for scalable enterprise applications, improving overall system reliability.
- Developed microservices-based and event-driven systems using Kafka and RabbitMQ, enhancing system decoupling and scalability.
- Built high-performance RESTful APIs supporting 50,000+ concurrent users, ensuring 99.9% uptime.
- Deployed and managed containerized applications on Azure Kubernetes Service (AKS), reducing deployment time by 40%.
- Improved overall system performance by 30% through caching, asynchronous processing, and database tuning.
- Led a team of 5 developers, conducted rigorous code reviews, and reduced technical debt by 25%.
- Implemented automated CI/CD pipelines using Azure DevOps and GitHub Actions, increasing deployment frequency by 60%.

### Senior Software Engineer

**Ivy Mobility Solutions** | April 2020 – May 2021

- Developed and maintained backend services for a large-scale Distribution Management System (DMS), processing 10,000+ daily transactions.
- Optimized critical SQL queries, resulting in a 20% improvement in average response time.
- Developed automated services for inventory updates and order processing, reducing manual intervention by 70%.

### Technology Analyst / Senior Developer

**Northern Lights Technology Development** | September 2017 – March 2020

- Developed enterprise-grade web applications using ASP.NET MVC and Angular for a user base of 5,000+.
- Built secure and scalable data processing systems capable of handling 1TB+ of operational data.
- Improved system stability by 15% by resolving critical production performance and availability issues.

### Senior Software Engineer

**TrueTech Solutions** | December 2014 – September 2017

- Developed and maintained multiple client-facing web applications using .NET technologies.
- Integrated 10+ third-party APIs and systems, expanding application functionality.
- Improved overall system efficiency by 18% through backend optimization and code refactoring.

## Software Analyst

ICM Solutions Services | February 2012 – May 2014

- Developed robust backend services and database components using .NET Framework and SQL Server.
- Created and optimized 50+ complex stored procedures, improving data operation speeds by 25%.
- Streamlined database operations, reducing report generation time by an average of 30%.

## KEY PROJECTS

### Nexeed Industrial Application System – Bosch

- Designed an event-driven microservices architecture to handle high-volume industrial data.
- Full-stack solution using .NET Core, Angular, and Azure, deployed on AKS.
- Enabled real-time monitoring and processing for 10,000+ data points per second, improving operational visibility by 40%.

### IVY DMS – P&G India

- Developed core modules for a Distribution Management System managing supply chain operations for 500+ distributors.
- Improved system performance by 20% through SQL query optimization and automated inventory services.

### NSITE – Taylor Corporation, USA

- Built a workflow monitoring and reporting platform for enterprise operations.
- Implemented advanced logging, alerting, and dashboard features, improving issue detection time by 50%.

## SKILLS

|                 |                                                                                |
|-----------------|--------------------------------------------------------------------------------|
| Backend         | .NET Core, C#, ASP.NET MVC, Web API, WCF, .NET Framework                       |
| Frontend        | Angular, TypeScript, JavaScript, HTML5, CSS3                                   |
| Cloud & DevOps  | Microsoft Azure, Azure DevOps, Docker, Kubernetes (AKS), CI/CD, GitHub Actions |
| Architecture    | Microservices, Event-Driven Architecture, Distributed Systems, REST API        |
| Messaging       | Apache Kafka, RabbitMQ                                                         |
| Databases       | SQL Server, Oracle, Stored Procedures, Query Optimization                      |
| Version Control | Git, TFS, Azure Repos                                                          |
| Quality         | SonarQube, Code Review, Technical Debt Reduction                               |

## EDUCATION

### Bachelor of Engineering (B.E.) – Information Technology

M. Kumarasamy College of Engineering, Karur, Tamil Nadu, India | Graduation: 2010

## CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900) – Microsoft

SAFe Agile Certification – Scaled Agile, Inc.

## ADDITIONAL INFORMATION

Eligible for EU Blue Card. Available to start within 3 months of receiving a job offer. Willing to travel within India and Europe as required.
